A long, multi-span bridge stretches across a wide body of water under a cloudy sky. The bridge features a series of concrete piers supporting a steel truss structure. The water is calm, reflecting the bridge and the sky. The overall scene is in a cool, blue-toned color palette.

**PROFESSIONAL MULTI-DISCIPLINARY
ENGINEERING CONSULTANTS**

Who We Are

Isao is a South Sotho word meaning 'Future' or 'Next Season'.

We are professionals with in-depth experience in our various fields of expertise allowing us to provide a one-stop solution in an Emerging Micro Enterprise. We are a young and energetic, 100% Black-owned and 40% Black woman-owned Emerging Micro Enterprise and we have a level 1 B-BBEE score on the Construction Sector Scorecard.

Isao Consulting is a client-centric organisation that is pedantic on understanding and correctly interpreting the client's requirements. We are quality, sustainability, and safety driven and place these three principles at the centre of our design processes and operating systems. Our differentiator lies in the skills we are able to leverage through our network of partners which ensures accountability and reduced client administration.

At Isao Consulting, we create built-environment consulting Solutions towards a brighter future.

Our Corporate Values

HONESTY

INNOVATION

INTEGRITY

CONSISTENCY

100% BLACK OWNED EME

VISION

We aspire to be a world Class supplier of built-environment consulting solutions throughout Sub-Saharan Africa.

MISSION

Our mission is to empower people to achieve their maximum potential in life through the provision of efficient and sustainable infrastructure they require to thrive!

From Our MD

At Isao Consulting we take pride in our ability to delivery world class professional services as a small business. Through the challenges presented by the Covid-19 Pandemic, our agility and flexibility allowed us to continue to grow the business during an extremely subdued business climate. By integrating and embedding sustainability and social aspects into our business strategy and our operations, we are creating the conditions for long-term value for our clients and the public at large.

Over the past 9 years we have worked hard to make Isao a safe and attractive place of work, one where end -users must be offered infrastructure solutions of high quality but also that Isao's solutions offer choices to our clients. This means reducing the environmental impact from Isao's solutions, offering zero harm solutions as well as placing environmental and social upliftment requirements within our sourcing and production process.

In our role as a responsible company we offer clients various choices when they engage our services. We have successfully launched service offerings in blended finance and alternative contracting to offer our clients alternatives to the traditional project finance and contracting typologies. Our long-term ambition is to be transparent and offer more choice to the client and end-user when making trade-offs on project financing and contracting methods.

We are committed to excellence and have set ourselves ambitious targets to be among the industry leaders as can be seen in our industry body participation and our recent ISO 9001-2015 Quality Management System certification. We will continue to set ambitious science-based targets during 2022 and beyond that encourage us to improve our Environmental and Occupational Health and Safety practices and similarly obtain certification with the relevant ISO standards.

Sechaba Kou

MD, ISAO CONSULTING

“

With research-driven thinking we help organizations improve performance and gain competitive advantage through thoughtful design. This embraces both physical environments and human experiences, putting people at the centre. In the digital age, data is the key to creating meaningful differentiation.

**We take care of business and
each other**

DESIGNING FOR AN INCLUSIVE ENVIRONMENT

Universally accessible spaces that respond to the needs of the greatest range of users will be thought through to the smallest detail, and the best design solutions will maximize inclusivity with no sacrifice to aesthetics.

What We Offer

In an era when anything is possible, and change is certain, projects that respond to shifts in consumer behaviour, technology, and the power of urbanity by successfully navigating and planning for these shifts will come out on top.

Civil Engineering

Structural Engineering

Mechanical Engineering

Electrical Engineering

Project Management

Environmental Compliance

Occupational Health and Safety

PPPs and Alternative Finance Advisory

Providing a one-stop solution for improved accountability and efficiency.

PROJECT MANAGEMENT

Our Project Managers are experienced to coordinate all the disciplines we provide in – house and any specialists that might be a part of a project.

CIVIL ENGINEERING

Our Civil Engineers are active across the Roads and Transportation fields, Water and Sanitation and Labour Intensive Construction.

ELECTRICAL ENGINEERING

Our Electrical Engineers provide solutions for heavy and light current electrical work, including electronic engineering, BMS and renewable energy solutions.

ENVIRONMENTAL COMPLIANCE

We provide guidance on Environmental Risks, Compliance with legal requirements and assist in the planning of activities to maintain the integrity of socio-economic and ecological systems in a sustainable way.

OCCUPATIONAL HEALTH AND SAFETY

Our OHS Consultants will ensure H&S compliance from the design and procurement stages. We will conduct construction permit applications and compliance monitoring during construction phases.

STRUCTURAL ENGINEERING

Our Structural Engineers are experienced across heavy and light industrial sectors, commercial, institutional and residential buildings as well as the associated civil components.

MECHANICAL ENGINEERING

Our Mechanical Engineers provide specialist HVAC, vertical transportation and fire protection design. We provide pump sizing and process mechanisation on industrial treatment projects.

PPP'S AND PROJECT FINANCE ADVISORY

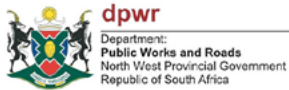

We provide transaction advisory services on Public Private Projects , Output and Performance Based Road Contracts (OPBRC) and other alternative contracts and blended finance projects.

INFRASTRUCTURE CONDITIONAL ASSESSMENTS

Client Portfolio

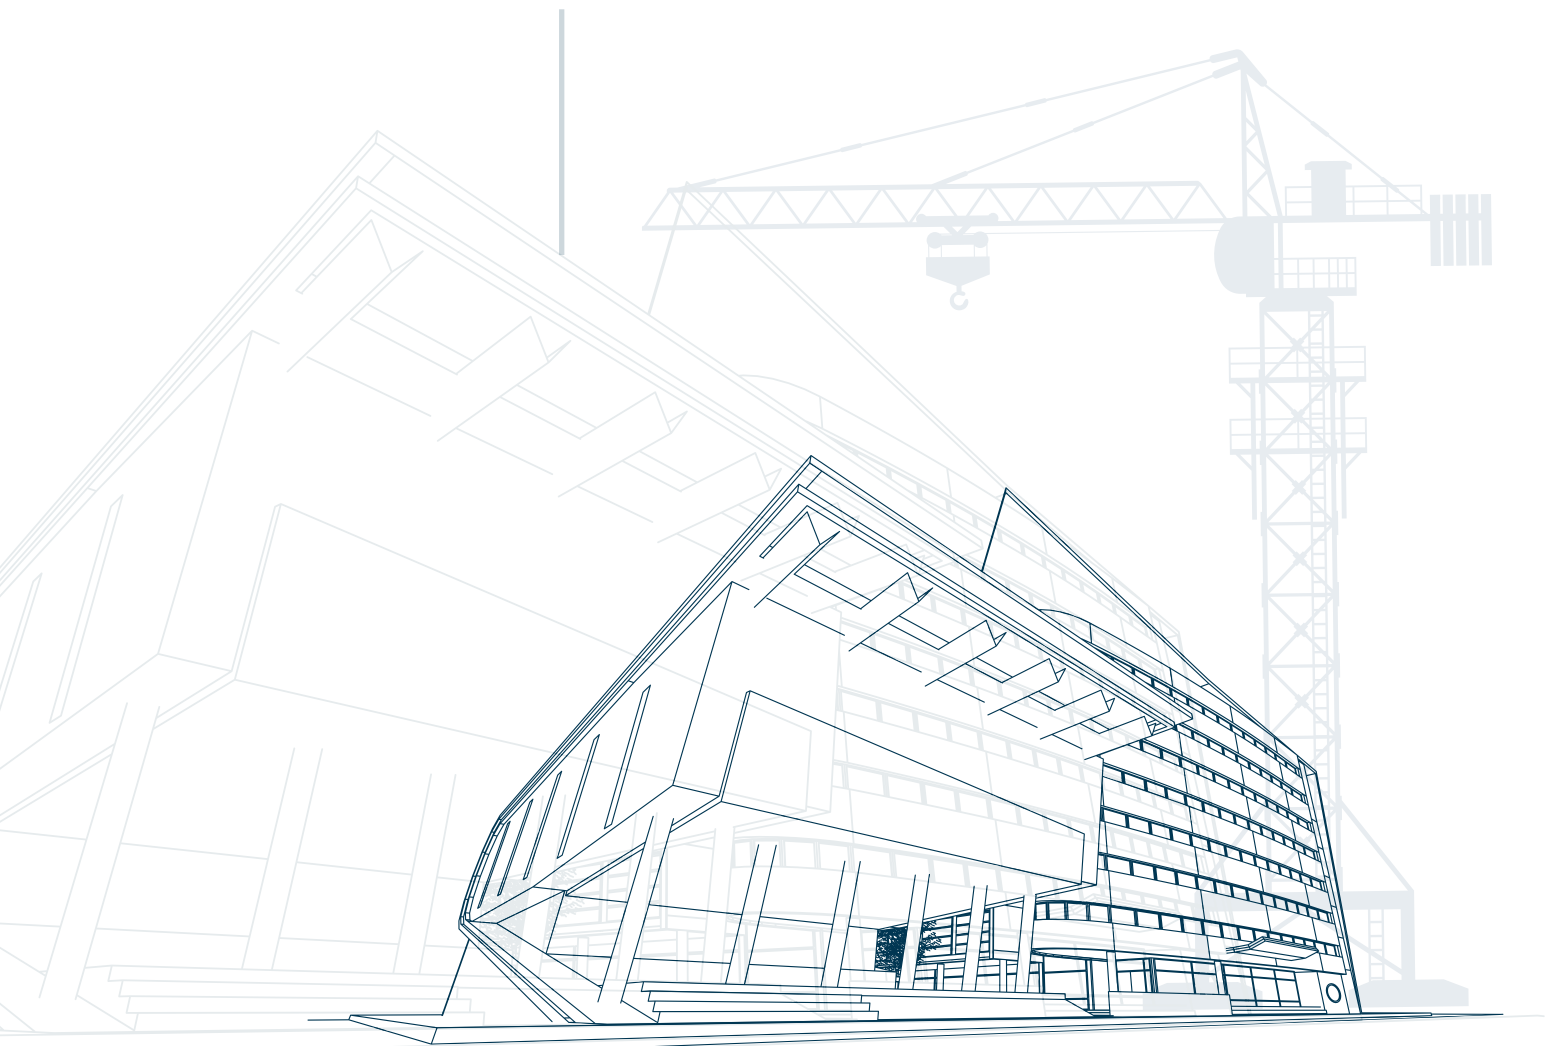

Portfolio Overview

(Selected projects)

Taking a more regenerative, resilient approach to planning , developing and engineering of spaces, buildings and infrastructure.
